

# Caroline Finlay

## Profile:

**Job Title:** Director

**Qualifications:** ONC, HNC (Electronic Eng)  
DMS (Dip Management Studies)

## Summary:

Caroline set up Managed Technology Services Limited in 1998 and has been a Director ever since. In the last 11 years Managed Technology Services Limited has become the market leader in equipment and Managed Equipment Service consultancy.

Caroline has a Biomedical Engineering background and has worked on a wide range of equipment projects in the UK producing option appraisals, business cases, procurement strategies undertaking medical equipping and operational reviews and implementation plans. She has also advised Trusts and bidding consortia on major PFI development schemes as well as smaller capital equipping schemes in respect of service planning, design, output specifications, investment planning, service configurations, procurement and operational solutions. Caroline has successfully project managed service contracts within six PFI contracts that have reached financial close. She is currently involved in a number of hospital development projects including the Barts and the London project and Broomfield PFI Project.

Whilst most of Caroline's experience is based in the UK she has assisted in developing PFI procurement strategies with representatives of the Canadian and Egyptian health economies. Caroline has actively been involved in the commissioning of 12 hospital projects.
